Overview

This NPPE Candidate Guide is the official guide to policies and procedures for the NPPE. All candidates are strongly encouraged to read this document before starting the exam registration process. It is your responsibility to make sure that you have reviewed the current version of this document.

The National Professional Practice Examination (NPPE) confirms knowledge of several content areas as outlined by the exam blueprint. Thirteen engineering and geoscience regulatory organizations across Canada use the NPPE as one of their requirements for licensure.

An application for professional membership to your provincial/territorial regulator might be required before you are allowed to take the NPPE. Contact your provincial/territorial regulator, or visit the regulator website, to find out more information on registration requirement.

The exam is computer-based and is administered through Meazure Learning, a merger of Yardstick, a Canadian computer-based testing vendor, and ProctorU, an online proctoring service. There are five exam administration sessions offered per year.

The exam format is 110 multiple-choice questions, each with four options and only one correct answer per question. All questions are scored 0 (incorrect) or 1 (correct) with no penalty for guessing. The time to take the exam is 2.5 hours.

All NPPE exam questions are developed by qualified item writers—professional engineers and geoscientists from across Canada—who serve as subject-matter experts (SMEs). Each question aligns with the NPPE blueprint, which defines content areas and question weightings and has been nationally validated to ensure its relevance in assessing professional competencies.

To maintain exam quality, all questions undergo a rigorous field-testing process before becoming part of the live, scored exam. Each exam includes a small number of unscored experimental questions, a standard practice in high-stakes testing. These questions are embedded within the exam and are used to gather performance data, ensuring their effectiveness before potential inclusion in future exams. Experimental questions do not impact your results and are not identifiable.

Exam contact information

Questions regarding the NPPE are best directed to your provincial/territorial regulator.

Suggested study materials

The exam blueprint outlining the content areas that are covered on the exam can be found on the NPPE website: [Blueprint](#)

The blueprint is a guide to help applicants determine what information they need to know and to bring to the exam in order to demonstrate their knowledge of the material. Although there are suggested study materials listed below, applicants can gain mastery of the topics covered on the exam any way that works best for them.

Textbooks

Below are suggested textbook resources to help you prepare for the NPPE. It is up to you to determine what resources are best to prepare for the exam. Most applicants find using one ethics textbook and at least one of the law textbooks helpful:

Canadian Professional Engineering and Geoscience: Practice & Ethics, Fifth or Sixth Edition, 2014/2018 by Gordon C. Andrews, Patricia Shaw, John McPhee

Practical Law of Architecture, Engineering, and Geoscience, Second or Third Canadian Edition, 2011/2015 by Brian M. Samuels and Doug R. Sanders

Law for Professional Engineers: Canadian and Global Insights, Fifth Edition, 2019 by Donald L. Marston

Practical Guide to Ethics and Professional Practice for Engineers and Geoscientists, First Edition, 2022 by Brian M. Samuels and Doug R. Sanders

These textbooks can be purchased directly from the publishers or through physical/online book retailers.

Additional free suggested study materials

Below are free suggested study materials that can be used to help prepare for the examination.

NPPE practice test site

Practice tests created from previously administered NPPE questions are available for optional purchase from the official NPPE practice test site: www.nppepractice.com

The NPPE practice tests offered through the website provide candidates preparing for the NPPE test questions to become familiar with the types of questions that will be asked on the actual NPPE.

All candidates that take the NPPE practice tests receive a detailed diagnostic report showing the blueprint areas of strength and weakness as well as a question-by-question level breakdown of which questions were answered correctly or incorrectly with rationales as to why the correct answer to each question is correct.

The practice tests are administered using the same computer-based testing platform as the actual NPPE, ensuring that the testing interface and features are identical to the actual NPPE. This helps familiarize candidates with the look and feel of the NPPE to help reduce test anxiety. The practice test questions were previously administered questions that appeared on previous NPPE exams and are meant to give candidates an approximation of the types of questions that test the blueprint areas assessed on the exam. The difficulty of the practice test questions are not identical to those that appear on the actual NPPE examination and passing the NPPE practice test is not a guarantee that a candidate will pass the NPPE exam.

Registration process

Registering for the NPPE is done through each provincial/territorial regulator. For more information regarding registration in your jurisdiction contact your regulator.

Testing accommodations

Specific testing needs can be accommodated for those candidates who are taking the NPPE. Testing accommodations can include:

- extended testing time
- extra breaks
- reduced-distraction testing rooms (for test centres only)
- larger font (available to all candidates in the stock exam interface)
- diabetic monitor or food/drink needed during exam for medical reasons

Generally, testing accommodations are not offered for English as a second language candidates as sufficient English language competence is a requirement for licensure in the 13 Canadian jurisdictions.

To submit a request for testing accommodations, contact your provincial/territorial regulator when registering for the exam. Supporting documentation from a health care or education specialist (written within the last three years) is required outlining:

- details why testing accommodations are needed for a computer-based exam
- specifically, what accommodations are required (e.g., one hour of extra time is required due to a visual impairment)

You must submit the testing accommodation request and supporting information before the registration deadline. If the request is received after the registration deadline, your exam will be rescheduled to the next session.

Virtual/remote proctoring and test centres

Since April 2020, the NPPE has shifted from being administered mostly in test centres to 100% remote proctoring. Remote proctoring is a process in which candidates take the NPPE via a computer with a webcam and a high-speed internet connection where they are proctored (supervised) by a virtual proctor via their computer. Remote proctoring is sometimes referred to as “virtual”, or “online proctoring” and in the context of the NPPE these are all referring to the same process of a candidate taking the exam in their home and being monitored by a proctor through the internet via webcam, audio, etc. Meazure Learning/ProctorU is the remote proctoring company used for the exam, which will be mentioned in the booking email that explains how to book the exam date and time.

Remote proctoring will be the preferred delivery method for the exam going forward, with test centres as an option for exceptional cases.

Confirmation email process for remote proctoring

In the case of exams done remotely, candidates will receive an email from Meazure Learning with instructions on how to book their remote exam date and time for the exam (based on availability). It is important to check your junk email folder to ensure that the email is not accidentally filed there. Should you not receive an email with this confirmation information at least three weeks prior to the examination date, you should contact Meazure Learning immediately and request that an exam grant email be resent to you: testingsupport@meazurelearning.com

It is very important that candidates choose their time zone carefully, as booking yourself in an incorrect time zone can lead to your exam time being missed (it is listed in a [24 hour clock format](#)). Booking an incorrect time zone and missing your scheduled exam time will result in a second exam fee charge if you are rebooked.

Confirmation email process for in person testing

If you are approved to write the NPPE at a testing centre, you will receive a confirmation email from Meazure Learning approximately 10 days before the administration regarding your exam date, time, and testing location. It is important to check your junk email folder to ensure that the email is not accidentally filed there. Should you not receive an email with this confirmation information a week prior to the administration,

you should contact Meazure Learning immediately and request the confirmation email be resent to you: testingsupport@meazurelearning.com

Rescheduling, cancellations, refunds

Prior to the exam registration deadline, the exam may be cancelled and refunded or deferred to a different session. Once the deadline has passed, the exam fee is non-refundable. Deferrals can be requested until the exam booking deadline (listed in the Meazure Learning booking email), in the event of a medical emergency or illness, death in the family, court appearance, or military duty. A deferral form can be requested through your provincial/territorial regulator. Appropriate supporting documentation such as a doctor's note must be provided.

Exam day process –Remote Proctoring

Candidates will receive a booking confirmation email from Meazure Learning that explains the remote proctoring exam process and the steps they should take on exam day. It is important to run all the computer checks that are suggested, and to ensure that all the computer requirements are met, including having a webcam and a high-speed stable internet connection. The remote proctoring program that needs to be installed on your computer cannot be downloaded until the day of your exam so there is no way to check if it will work prior to exam day. There is a short video tutorial that may be helpful, that you can watch through the Meazure Learning FAQ page here <https://www.meazurelearning.com/products/meazure-exam-platform/online-proctoring-faq>. It is best to take the exam in your home because you are more in control of the security and administrative privileges on home Internet networks and home computers. Work / school computers and networks are unpermitted (due to firewalls, restrictions on installing the necessary software to take the exam, etc.) and it is mandatory to use a personal device and network. If you choose to use a work / school computer and network, you may be subject to an additional fee for a rebooking if your device is not able to download the exam program.

To ensure a seamless testing experience, follow these key guidelines about software on your computer:

- **Avoid Virtual Machines and Remote Control Software:** Do not use virtual machines or remote access tools like **AnyDesk, TeamViewer, RemotePC** during your exam. These programs can lead to your test session being terminated. To avoid issues, uninstall any such software well before your test day.

- **Disable or Remove Restricted Programs:** Certain applications, such as **Grammarly or Snipping Tool**, are not allowed during testing. Your proctor may ask you to disable or uninstall these programs before starting the exam. Check your device in advance and remove or turn off any restricted software to prevent delays.

It is important to note that a valid, government-issued photo identification (e.g., driver's license, passport, or permanent resident card) that includes a signature must be presented for identity verification.

Candidates have a 15-minute window to log on to the exam program, or the exam will be cancelled. Connecting to the remote proctor may take up to 30 minutes after candidates log on. Only click the link once. **Do not log off and log back in if you do not connect right away or exit out of the browser**, as this will be viewed by the remote proctor as the exam session being cancelled. Think of this process as boarding a plane and then sitting and waiting for the plane to take off. Just as you would not get off the plane, do not log out of your connection to the exam program, just wait for the proctor to connect. It is completely ok if this connection time bypasses your exam start time, as long as your initial connection is still open, you will not be penalized in any way in terms of the time you have to take the exam. If technical issues occur trying to connect to your exam or during your exam, you must contact Meazure Learning as soon as possible. The contact information will be in your booking confirmation email. It is best to call for an immediate response. You are allowed one optional comfort (e.g., washroom) break during the exam, but the exam timer will not stop during this break. This comfort break will be noted by the remote proctor. If you require multiple comfort breaks due to a medical issue, please let your regulator know when you register for the exam, and it will be noted as a testing accommodation. If there are technical issues out of your control that prevent you from taking your exam, a rebooking option may be available to you, depending on availability. This would be a last resort option if all other appropriate steps were taken.

Once you have completed the check-in process with the proctor and digitally signed the NPPE Candidate Instructions and Statement of Understanding, you will proceed to the exam, at which point the exam timer will begin.

The Meazure Learning exam testing interface for the NPPE is designed to be highly intuitive and provides tools (e.g., bookmarking questions, writing notes on questions, ability to increase or decrease the font size, etc.) to assist candidates in taking the exam. Candidates who register for the NPPE will have free access several weeks prior to the exam administration date to become familiar with the NPPE test taking interface. A screenshot of the NPPE exam interface is shown below.

Question 1 of 10 Time Remaining: 00:29:33 **SUBMIT EXAM**

Show question list ▾

Language: English Français Font Size: T  T 

During the examination, your task will be to select the correct answer to the question from a list of options. Which of the following is the correct method of selecting your answer?

- A) Clicking on the radio button (circle) corresponding to your answer.
- B) Clicking on the Bookmark icon.
- C) Clicking the 'Hide Question List' in the exam toolbar.
- D) Clicking the "Go to Next Question" button on the bottom left of the screen.

Once you have completed the NPPE on exam day you will be prompted to complete a short survey where you will be able to provide feedback on your exam experience.

It is the candidate's responsibility to read the available preparatory material regarding the NPPE in order to come prepared for their exam sitting. All information required for candidates to understand and prepare for the NPPE is available on the NPPE website (www.nppexam.ca) and the NPPE candidate guide. This includes the format and time limit of the NPPE, registration deadlines, booking process, technical and equipment requirements to take the NPPE, security procedures, results reporting, etc. Candidates that do not prepare adequately to take the NPPE and experience issues on exam day may not be rebooked or deferred to an upcoming session and will have their results stand as an attempt of the exam. As such it is critical that all candidates that take the NPPE spend the required time in advance to know what to expect and come prepared for their exam session.

As the NPPE is a computer-based exam that requires specific hardware, software, internet and testing-room requirements, issues can occur during the exam session. Should any issues occur on the day a candidate takes the NPPE, all issues must be reported, and the issues resolved that same day. For example, if a candidate experiences some intermittent connection issues on exam day, and as a result the candidate feels that the interruptions were negatively impacting their performance on the exam and should receive extra time to finish the exam, the candidate must escalate this concern to the proctor monitoring the candidate's exam session. In this way, issues can be resolved while the candidate is taking the exam (e.g., adding additional time), or shortly after the candidate's exam session is complete on the same day. After the examination session is complete there are limited options to resolve an issue that occurred during that session. As a result, only issues that fall into the follow categories may be reported and will be investigated by NPPE staff: 1) Reporting incidence of cheating or other exam security issues, 2) Emergency situations that occurred during the exam session that could not be

reported during the exam session week (e.g., medical emergency that occurs on exam day), 3) Other exceptional circumstances that may have impacted a candidate's performance on the exam, of which the candidate was unable to report during exam day, with an explanation as to why the issues could not be reported on exam day.

Unexpected Exam Disruptions

In rare cases, unexpected events may occur during your exam that could impact your testing experience. These situations may include, but are not limited to:

- A technical issue preventing you from accessing or completing your exam
- A system outage or disruption from the exam provider
- An emergency requiring the exam session to be paused or rescheduled

If you experience an issue during your exam, please remain calm and follow any instructions provided by your proctor. You do not need to take any immediate action beyond reporting the issue at the time of occurrence.

Your regulator will review the situation and provide you with the next steps within 24 hours. Please monitor your email for further instructions before reaching out.

Exam security and exam irregularities

The following situations may prompt the consideration of invalidating or canceling exam results even though you may have had no responsibility for the event in question:

- Unanticipated cancellation or interruption of testing or deviation from required testing procedures, due to a weather event or other external cause
- Possible advance access to exam content by one or more candidates
- Other disruptions or compromises to the normal testing process

If it is concluded that corrective action is warranted in one of these situations, you may be offered the option to either retest at no additional fee or to receive a full or partial refund of your registration fee provided that you did not cause and were not involved in the conduct that resulted in corrective action. These remedies are your exclusive remedies for such disruptions in testing and potential compromises. If you choose to retest, you must retake the entire exam to produce valid exam results. If you are found to have caused or been involved in the conduct that resulted in corrective action, the matter may

be treated as an exam irregularity and all available remedies may be pursued as described elsewhere in this guide.

Fraud, deceit, dishonesty, unprofessional behavior, and other irregular behavior in connection with taking the NPPE are strictly prohibited. Irregular behavior includes but is not limited to the following: failing to work independently; not following the proctor's instructions; impersonating another individual or permitting such impersonation (surrogate testing); possessing prohibited items; communicating with other examinees or any outside parties by way of cell phone, personal computer, the Internet, or any other means during an exam; disrupting other examinees; creating safety concerns; and possessing, reproducing, or disclosing any exam questions, answers, or other information regarding the content of the exam before, during, or after the exam administration. Evidence of an exam irregularity may be based on your performance on the exam, a report from an administrator or a third party, or other information. The proctor is authorized to take appropriate action to investigate, stop, or correct any observed or suspected irregular behavior, including discharging you from the test center and confiscating any prohibited devices or materials (for in person testing at a testing centre), or terminate your testing session (for remote proctored exam). You must cooperate fully in any investigation of a suspected irregularity. The NPPE exam program reserves the right to pursue all available remedies for exam irregularities, including canceling scores and pursuing administrative, civil, and/or criminal remedies. If you are involved in an exam irregularity, the following may occur: invalidation of results, notification to your provincial/territorial regulator, forfeiture of exam fees, and restrictions on future testing. Some violations may incur additional consequences, to be pursued at the discretion of your regulator.

Collusion detection analysis is performed after each exam administration to statistically identify pairs of candidates that may have copied answers. Candidates that are flagged as potentially having colluded will have their examination results withheld pending an investigation into the matter.

Applicants and Professional Members are obligated to report any test security issues they are aware of, whether they occurred before, during, or after the exam. Incidents can be reported anonymously to nppe@apega.ca.

All candidates must read and digitally sign a candidate statement of understanding prior to taking the NPPE which outlines the expectations and rules for taking the exam.

Exam Administration Dates

Please note that you must register by the registration deadline to receive the booking email and be eligible to book the NPPE. The booking email is sent on the first day of the booking window.

2026

Exam Dates	Registration Deadline	Booking Window Dates
January 19 – 21, 2026	December 5, 2025	December 19, 2025 – January 4, 2026
March 30 – April 1, 2026	February 13, 2026	February 27 – March 15, 2026
June 8 – 10, 2026	April 24, 2026	May 8 – 24, 2026
August 17 – 19, 2026	July 3, 2026	July 17 – August 2, 2026
November 2 – 4, 2026	September 18, 2026	October 2 – 18, 2026

Please note that if your exam is scheduled on the last day of the administration period, rescheduling due to any issues may be challenging within the same session.

Exam fees

Examination fees are charged by each participating regulator. Contact your provincial/territorial regulator, or visit the regulator website, to find out more information on NPPE pricing in your jurisdiction.

Exam scoring, rescores, results, and retakes

The NPPE conforms to all standards for psychometrically defensible high stakes testing as outlined in the “Standards for Educational and Psychological Testing”¹.

The NPPE is a criterion-referenced examination, and so only pass/fail results will be reported. If you pass the exam, you will not receive detailed score information. Exam results are either pass or fail based on the number of correct answers (1 point per correct answer) you achieved on the operational (scored) questions on the exam. You are not penalized for incorrect answers. The cut score on the NPPE is a scaled score of 65 and determined using a best practice Standard Setting approach (i.e., the Modified-Angoff Method) where Subject Matter Experts from across Canada participate in setting the minimum standard required (i.e., minimum level of knowledge) for candidates to be able to demonstrate on the exam in order to pass. A scale score of 65 does not correspond to answering 65% of the questions correctly. This is because we use a statistical equating method to account for variations in exam difficulty across different sessions, ensuring

¹ American Educational Research Association, American Psychological Association, & National Council on Measurement in Education. (2014). *Standards for educational and psychological testing*. Washington, DC: American Educational Research Association.

fairness for all applicants. Due to this reason, reverse calculation based on percentage scores from the mastery report to the NPPE scaled score is not possible. Candidates should come to the NPPE ready to demonstrate their knowledge of all of the blueprint areas. ETS, one of the largest and well-respected testing organizations in the world, has published a report that explains test equating in more detail: <https://onlinelibrary.wiley.com/doi/epdf/10.1002/j.2333-8504.2010.tb02236.x>

Each NPPE is scored with no predetermined percentage of candidates that should pass or fail. All exams are scored the same way. First-time takers and repeat takers are graded to the same standard.

APEGA's service provider for computer-based testing and online remote proctoring, Meazure Learning, uses automated system for capturing your responses during the exam. Your answer to each question is recorded immediately, ensuring accuracy and eliminating the risk of human error. Since the NPPE is a multiple-choice test with no written responses, a review of the exam result would not change the outcome.

Exam results are available approximately 2-3 weeks after the exam administration. Candidates will be notified of their result before the next registration deadline. Results are not provided over the phone or by email. Candidates that failed the exam are sent a mastery report which outlines the content areas of the exam where the candidate did well and areas where the candidate did not do well and should focus further study. An example mastery report is shown below.

NPPE INDIVIDUAL MASTERY REPORT

Regulator: EGBC
For: Jane Doe
ID: 111111

NPPE administration date: Week of June 6, 2022
Result: Fail

To assist you in studying for your next writing of the National Professional Practice Examination (NPPE), please find below an individual mastery report. This report provides a summary of how you performed in each of the blueprint areas of the NPPE. This report is intended to assist you in identifying the weak areas in which you need to focus your study to improve in the future. It is not possible to calculate your overall score on the exam using this report, please rely on the information below to guide your study for your next attempt of the exam.

It is suggested that in preparing for the next examination you focus most on the blueprint areas listed in the mastery report that you did not master and those that you borderline mastered. For example, if the report below shows that you did not master the blueprint area 'III. Professional Practice' the topic areas covered within this blueprint area should be studied in depth before attempting the examination again because you selected the correct answer for less than 55% of the questions in this area. If the report shows that you borderline mastered the area "II. Ethics" this means that you came close to mastering the material but did not answer enough questions correctly to have fully mastered this area. You will be required to retake the entire NPPE (all blueprint areas) and pass the exam in a future attempt.

Some study techniques that can be effective in preparing for the next examination administration:

- Reading the chapters in the textbook resources and making notes regarding what you learned, writing in your own words about the material covered
- Discussing with mentors and peers what the textbook resource content means in practical terms to a professional
- Completing the chapter questions, discussion topics, and assignments at the end of each chapter of the textbook resources will ensure that you have understood the material
- Although the NPPE is not a test of English language competence a minimal level of English language competence (e.g., approximately a grade 10 reading level) is required to read and comprehend the questions composing the NPPE. Improving your English language reading and comprehension skills may help improve performance on the examination

Mastery report:

Blueprint area	Percentage correct	Your performance*
I. Professionalism	50	Not Mastered
II. Ethics	75	Mastered
III. Professional Practice	59	Borderline Mastered
IV. Law for Professional Practice	56	Borderline Mastered
V. Professional Law	50	Not Mastered
VI. Regulation of Members & Discipline Processes	50	Not Mastered

*Mastered = 70% or more of questions in a blueprint area were answered correctly; Borderline mastered = 55-69% of questions in a blueprint area were answered correctly; Not Mastered = Less than 55% of the questions in a blueprint area were answered correctly.

If a candidate failed the NPPE it is because not enough questions were answered correctly to demonstrate minimal knowledge, skills, and ability in the blueprint areas covered on the exam. It is not possible to reverse calculate an equated NPPE score from the master reports. Candidates should focus their time and effort on studying the blueprint areas indicated in the mastery report where they did poorly. Candidates don't have to "master" every blueprint area, but the areas shown as "Not mastered" or "Borderline mastered" are the areas to focus study to prepare for a future attempt of the NPPE.

An example of a mastery report showing a clear fail is shown below. A candidate that received a mastery report like this can use it to focus study on all areas of the blueprint to prepare for the next attempt but especially in areas I, II, and IV where very little knowledge of the concepts was demonstrated.

Mastery report:

Blueprint area	Percentage correct	Your performance*
I. Professionalism	50	Not Mastered
II. Ethics	42	Not Mastered
III. Professional Practice	66	Borderline Mastered
IV. Law for Professional Practice	42	Not Mastered
V. Professional Law	56	Borderline Mastered
VI. Regulation of Members & Discipline Processes	56	Borderline Mastered

*Mastered = 70% or more of questions in a blueprint area were answered correctly; Borderline mastered = 55-69% of questions in a blueprint area were answered correctly; Not Mastered = Less than 55% of the questions in a blueprint area were answered correctly.

The example mastery report below illustrates a candidate who did not pass but came close to the passing threshold. The report shows strong performance in Areas I, II, and VI, and borderline performance in a few other areas. However, weaker performance in Area IV had the greatest impact on the overall result. For future preparation, the candidate should focus on improving in Area IV, while also aiming for slight improvement in the borderline areas to strengthen overall mastery.

Mastery report:

Blueprint area	Percentage correct	Your performance*
I. Professionalism	88	Mastered
II. Ethics	75	Mastered
III. Professional Practice	69	Borderline Mastered
IV. Law for Professional Practice	41	Not Mastered
V. Professional Law	63	Borderline Mastered
VI. Regulation of Members & Discipline Processes	75	Mastered

*Mastered = 70% or more of questions in a blueprint area were answered correctly; Borderline mastered = 55-69% of questions in a blueprint area were answered correctly; Not Mastered = Less than 55% of the questions in a blueprint area were answered correctly.

Policies on the number of attempts allowed to write the NPPE vary by regulator. In most jurisdictions, candidates are allowed a maximum of four attempts to pass the NPPE. It is recommended that you contact your regulator for specific details on the attempt limit.
